

Quality Policy

AUTOMA establishes priority rules concerning Quality Policy, consistent with the objectives and business strategy:

- ✓ Understanding needs and expectations both of market and customers, allowing the development of the hardware and software products.
- ✓ Helping customers in a timely and effective manner, regarding installation and delivery of the hardware and software products.
- ✓ Acquiring resources, appropriate and updated tools for design and development.
- ✓ Outsourcing the production to qualified companies.
- ✓ Monitoring the production of the devices and test them so as to guarantee compliance with the required standards.
- ✓ Ensuring professional growth and update training for all personnel.
- ✓ Ensuring compliance of the certified products according to ATEX 2014/34/UE.

The rules concerning Quality Policy are pursued by:

- ✓ Identification, implementation and control of processes adequate for products in accordance with requirements.
- ✓ Procedures implementation of the quality management system for reaching customer satisfaction, by the continuous improvement of the company.
- ✓ Participation of employees by communication of Quality Policy, development of the quality management system procedures, information on results achieved and problems related to quality.
- ✓ Participation of suppliers that have important influence on the quality of the products; AUTOMA supports them for introduction and control of the quality processes of supplies.

Management
Giorgio Giorgetti

A handwritten signature in black ink, appearing to read "Giorgio Giorgetti". The signature is fluid and cursive, written over the printed name.
